

## Barts Life Sciences – Company Profiles

### **HealthNix**

**Website:** <https://www.healthnix.io>

**About:** HealthNix is focused on precision health self-management for arthritis patients, aiming to extend their healthy lifespan by 5 years by 2035 through a food-as-medicine approach.

**Working Pattern:** Waltham Forest and Islington – Remote hybrid, including days in the South London office.

**Offer:** HealthNix seeks an intern to provide operational support across various business areas. This includes coordinating research projects, assisting with marketing campaigns, and contributing to product development, stakeholder management, and project management. They are passionate about learning and mentoring, offering an enriching experience for interns eager to dive into the health tech industry.

### **Well Adapt**

**Website:** [www.well-adapt.com](http://www.well-adapt.com)

**About:** Well Adapt focuses on supporting individuals with chronic illnesses, aiming to improve overall wellbeing.

**Working Pattern:** Pan-London – with a co-working space in Stratford.

**Offer:** Well Adapt offers a flexible internship role that can focus on marketing, community management, sales, or business development, depending on the intern's interests and current company requirements. The team is committed to providing training and helping interns develop the skills necessary to succeed in their tasks.

### **StoriBoard**

**Website:** <https://storiboard.co.uk/>

**About:** StoriBoard is dedicated to enhancing wellbeing through an app that connects individuals to a compassionate network of certified experts by experience for personal support in both physical and mental health.

**Working Pattern:** Islington – 3 days a week in Archway.

**Offer:** StoriBoard seeks an intern to support various areas, including marketing, product development, and business development. They are particularly interested in evidence generation and reviewing available research.

## **Hibi Health**

**Website:** <https://hibi.health/>

**About:** Hibi Health offers an app designed to support families of children with developmental and health conditions in managing care coordination.

**Working Pattern:** Hackney – 3 days a week in an office.

**Offer:** Hibi Health seeks an intern to focus 70% on go-to-market activities such as outreach, partnership proposals, and social media, and 30% on product management, depending on the intern's background. They offer technical support if the intern has relevant skills and ensure wide exposure to various aspects of the SME, providing a comprehensive learning experience.

## **Tiny Medical Apps**

**Website:** <https://tinymedicalapps.com/>

**About:** Tiny Medical Apps specialises in digital health passports, particularly focusing on asthma management.

**Working Pattern:** Remote

**Offer:** Tiny Medical Apps offers an internship that includes networking, development of business promotional materials, gathering feedback from the existing user base, and project management. They are committed to providing mentorship, including networking opportunities, CV development, and participation in conferences and events. They also offer feedback and evaluation to help interns develop their career paths.

## **Tefago/Compassly**

**Website:** [www.compassly.com](http://www.compassly.com)

**About:** Compassly, under Tefago, provides a clinical competency-based tool.

**Working Pattern:** Remote – with one day a week at a site.

**Offer:** Compassly seeks an intern to support product development, communication, and marketing to both existing and prospective customers. They offer online training and can also support data science and dashboard reporting tasks. The role can be adapted based on the intern's skills and expectations, with opportunities to work on more analytical and reporting projects if they have strong analytical or data science skills.
